

UNITED STATES OF AMERICA
FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D.C. 20554

In The Matter Of:)	
)	
Creation Of A)	Docket No. RM-11287
Low Power AM Radio Service)	

JOINT SUPPLEMENTAL COMMENTS OF
WILW RADIO,
THE LPAM NETWORK
AND
6 OTHER PARTIES

The 8 undersigned parties filed Joint Written Comments, in FCC Docket RM-11287, on November 15, 2005.

However, we inadvertently neglected to include one proposed provision in the section of those Comments which concerns reasonable regulatory requirements for Low Power AM (LPAM) antennas and ground systems.

We ask the Commission, as it considers our proposed regulatory requirements, to incorporate the following unintentionally omitted provision:

“(F) A standard ground system may be installed, and truncated ground systems allowed, where property restrictions prevent installation of of one with one quarter wave radials.”

This proposed provision will prevent rigid property restrictions from effectively blocking the siting of new LPAM stations.

Respectfully submitted,

William C. Walker

Proprietor and General Manager
